Summer Enrichment Program

Educational Activities

Structured educational curriculum that includes:
Biology, Chemistry, and Physics.

Interactions with professionals from various healthcare professions to discuss their educational and profession requirements.

Program Overview

The Summer Enrichment Program (SEP) is a 2-week residential camp, hosted by the University of Kentucky Area Health Education Center, for students seriously considering a path to health careers. It's an opportunity to learn about various health careers, educational requirements and practice coursework related to health careers.

Benefits

- Exposure to various health professions/professionals
- Sneak peek at college life
- Insight into prerequisites for many health careers
- Resume booster
- Chance for CPR certification

Clinical Activities

Students will observe healthcare professionals in a clinical setting.

Students will spend time in two of UK's state of the art simulation centers, practicing hands on skills.
